Re: T1Y1/LB87-04

Dear Alvin:

Attached is AT&T Communications "Yes" vote on T1Y1/LB87-04 for the draft 32 kbit/s ADPCM Line Format Standard.

Absent any systematic search of our patents, we believe AT&T holds patents which may be of interest to this draft standard including, but not limited to, the bundled mode and robbed-bit signaling formats.

AT&T will license under reasonable and non-discriminatory terms and conditions, consistent with Appendix 1 of ANSI Procedures, September 9, 1987, rights to patents intrinsic to the implementation of this standard solely for the purpose of that implementation.

Sincerely yours,

A handwritten signature in cursive script that reads "Anthony Schiano".

Anthony Schiano
